

Why the #1 accuracy model has the worst certificate

nova_embed
Accuracy #1 (77.1%) | Alpha #15 (0.483)

openai_3_small
Accuracy #6 (74.5%) | Alpha #1 (0.514)

nova_embed: N recall = 0.956 (memorizes noise) | R recall = 0.661 (misses structure)
openai_3_small: N recall = 0.940 (comparable) | R recall = 0.654 (comparable) but R precision = 0.732 vs 0.650
